SUMMARY

Proven full stack developer with a passion to learn and work with new technologies that make a positive impact on society. Throughout my career as a software developer I've focused on developing scalable and well documented code. I enjoy working collaboratively but can also run with projects on my own. Dedicated to learning better ways to write clean and efficient code while keeping up with the newest tech stacks.

My life philosophy:

"Success usually comes to those who are too busy to be looking forit." -Henry David Thoreau "I find that the harder I work, the more luck I seem to have." -Thomas Jefferson
